Re: NATIONAL ROAD CONDITION ASSESSMENT FY 2022/23 (PAVED ROADS)

As part of the annual monitoring of the Road and Bridge network performance and subsequently planning for interventions, we have scheduled to collect Road condition data on the paved roads network. This activity is to be done using both in-house staff and field assistants, and shall be supervised by the Manager Network Planning and Network Engineers.

This data shall be used to update the road data bank, facilitating the operation of the Road Asset Management System and finally out putting maintenance and upgrading plans, as well as providing information on the operational condition and capacity of the road network.

This exercise is planned to run for approximately 3 months covering Visual condition assessment surveys, Road inventory surveys and ROMDAS surveys to collect International Roughness Index, Rut depth, geo referenced video data, geometry and high-resolution pavement Images among other datasets. These surveys will cover up to **5860 km** of paved roads.

Please find attached an activity schedule, and detailed breakdown of logistical requirements and costs totaling to **UGX. 132,340,000 (One Hundred Thirty-Two Million, Three Hundred Forty Thousand Shillings Only)**. These funds were budgeted under the Road fund work plan. For purposes of proper co-ordination and management of all activities, schedules for release of funds in a monthly phased manner is also attached here.

The purpose of this memo, therefore, is to request for your approval and subsequent release of the additional funds to enable the team to undertake this exercise.
